Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Jarvela et al. (U.S. Patent No. 5, 917, 851),

Regarding claim 1, Jarvela et al. discloses a method of estimating a communication path formed of a plurality of channels, associated with a plurality of antennae (column 1, lines 35-67), the method necessitating an estimate impulse response of the channels (Fig. 3, block 205, column 3 lines 64-67), comprising the steps of:

acquiring (Fig. 3, block 201, column 4, lines 2-7) a space statistic of the communication path, wherein the correlation result (code phase) is a space statistic;

establishing (Fig. 3, blocks 208 and 209, column 4, lines 9-38) a corrected impulse response at least by weighting the impulse response estimates by means of the space statistic and an estimate of the additive noise (interference level) of the channels, wherein the weights are formed from correlation result (space statistic) and the interference level (additive noise).

Art Unit: 2634

Regarding claim 2, which inherits the limitations of claim 1, Jarvela et al. discloses the space statistic corresponds to an estimate of the correlation of the communication channels taken two by two (Fig. 3, block 201, column 4, lines 2-7), wherein in Fig 3, the correlation is taken two by two (block 201).

Allowable Subject Matter

3. Claims 3-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis B. Odom whose telephone number is 703-305-4097. The examiner can normally be reached on Monday- Friday, 8-5.
